DETAILED ACTION

1. This action is in response to applicant's amendment received on 11/13/02.

Election/Restrictions

2. Claims 2-8, 11-13, 17-24 and 28 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention and species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 7.
3. Newly amendment claims 11 and 17 are now directed to the plurality of rails related to group II. Accordingly, claims 11 and 17 withdrawn from consideration as being directed to a non-elected invention.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 9, 10, 14-16, 25-26 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by O. F. Kleeb et al.

Kleeb discloses the invention including a platform 3, a support plate 19, a saw assembly, a saw blade 22, motor 4, an oscillating mechanism (see Fig. 1) and a pivot support 20 and a counterweight 61.

Response to Arguments

6. Applicant's arguments have been fully considered but they are not persuasive.

In regards to claims 11 and 17, Examiner appreciates that they were amended merely to provide antecedent basis. Nonetheless, the changed claims now are clearly grouped in group II. If Applicant would like to switch examination to group II, or a combination of group II with another group, this can be done in a continuing case, or in an RCE accompanied by an explicit statement that a different group is elected.

The examiner found that the last action the support plate was erroneously label with the number 20. The intention of the examiner was to identify the support plate as member 19.

Applicant argues that Kleeb does not disclose "the support plate being movably disposed on the platform" and "the counterweight arranged to move in a direction opposite to the direction that the support plate moves". Kleeb discloses the support plate 19 being movably disposed on the platform 3 by the member 17 connected to the member 18. Also, Kleeb teaches the counterweight 61 moving upward direction when the support plate is moving in the downward direction.

Applicant argues that Kleeb does not disclose "oscillating means that is located on top, the support plate beneath that and the platform at the bottom". In claim 14 there is no evidence of the limitations mentioned above. Furthermore, Fig. 2 illustrates the

oscillating means located below the support plate. KleeB discloses oscillating means disposed on the support plate as claimed in claim 14.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
